## IESNA LM-80 Test Report

### 1. Applicable LUXEON® Series part number(s)

This IESNA LM-80 Test Report applies to the following LUXEON part numbers:

Product Family	Part Number	Nominal CCT
LUXEON 2835E 6V	L128-2780EB3500001	2700K
LUXEON 2835E 6V	L128-3080EB3500001	3000K
LUXEON 2835E 6V	L128-3580EB3500001	3500K
LUXEON 2835E 6V	L128-4080EB3500001	4000K
LUXEON 2835E 6V	L128-5080EB3500001	5000K
LUXEON 2835E 6V	L128-5780EB3500001	5700K
LUXEON 2835E 6V	L128-6580EB3500001	6500K
LUXEON 2835E 9V	L128-2780EC3500001	2700K
LUXEON 2835E 9V	L128-3070EC3500001	3000K
LUXEON 2835E 9V	L128-3080EC3500001	3000K
LUXEON 2835E 9V	L128-3570EC3500001	3500K
LUXEON 2835E 9V	L128-3580EC3500001	3500K
LUXEON 2835E 9V	L128-4070EC3500001	4000K
LUXEON 2835E 9V	L128-4080EC3500001	4000K
LUXEON 2835E 9V	L128-5070EC3500001	5000K
LUXEON 2835E 9V	L128-5080EC3500001	5000K
LUXEON 2835E 9V	L128-5780EC3500001	5700K
LUXEON 2835E 9V	L128-5770EC3500001	5700K
LUXEON 2835E 9V	L128-6580EC3500001	6500K
LUXEON 2835E 9V	L128-6570EC3500001	6500K

This report is issued to Lumileds internal use

## 2. L<sub>70</sub> Extrapolations per IESNA TM-21-11

If = 100mA	
T <sub>s</sub> = 105°C	> 60,000
T <sub>s</sub> = 85°C	> 60,000
	= Limited by TM-21 6x rule

## 3. Number of LED light sources tested

30 units tested per stress condition / data reported for 20 units per test condition

## 4. Description of LED light sources tested

LUXEON 2835E 9V: L128-3080EC3500001 (nominal CCT 3000K)

## 5. Dates Tests Started

All DATA SETs: 2014-10-04

## 6. Date Report First Issued

All DATA SETs: first reported on 2015-12-17

## 7. Package Pictures

Figure 1. Picture of LUXEON 2835.

## 8. Mechanical Drawing

For detailed mechanical drawings, please see individual product data sheets.

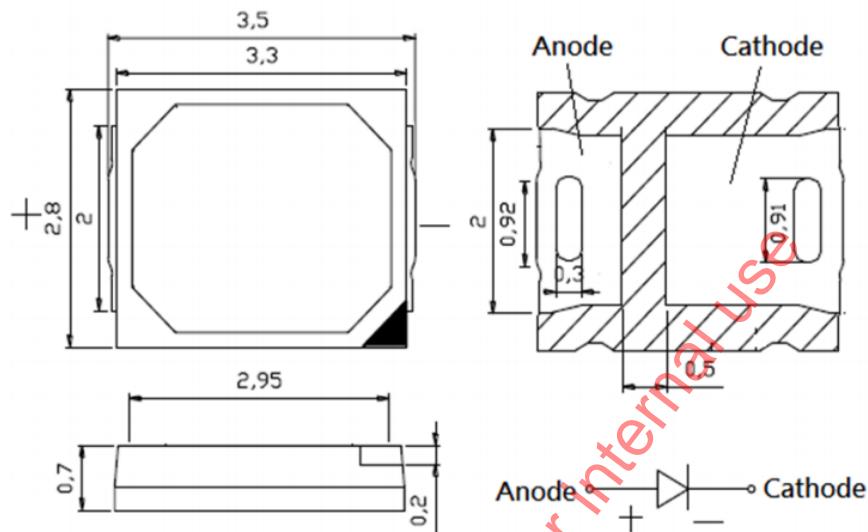

Figure 2: Mechanical Drawing for LUXEON 2835. All dimensions are in millimeters.

## 9. $T_s$ Measurement Point

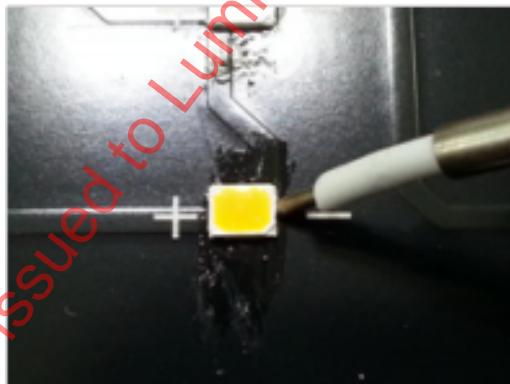

Figure 3: Preferred  $T_s$  measurement point for LUXEON 2835.

For further information on measuring the in-situ  $T_s$ , please see the appropriate application Lumileds Application Brief which is available online at [www.lumileds.com](http://www.lumileds.com).

## 10. Description of auxiliary equipment

LUXEON LED devices are soldered to reliability stress boards that can accommodate up to 25 devices and are driven by a constant current source.

Reliability stress boards are mounted in a chamber with minimal ambient airflow. The chamber temperature is controlled based on the temperature of a control  $T_s$  point, which is located on the stress board.

The reliability stress board is periodically removed from the thermal chamber, allowed to cool to room temperature, and then tested. After testing, the reliability stress board is returned to the thermal chamber for additional operation.

## 11. Operating Cycle

LUXEON LEDs are driven with a constant direct current (DC).

## 12. Ambient conditions including airflow, temperature, and relative humidity

The typical relative humidity within the chamber is < 65%.

## 13. $T_s$ and ambient temperatures (ambient temperature measured 5mm above reliability stress board)

In all cases, both  $T_s$  and  $T_{air}$  meet or exceed the IESNA LM-80-08 limits.

## 14. Drive current of the LED light source during lifetime test

See tables.

## 15. Initial luminous flux and forward voltage at photometric measurement current

See tables.

## 16. Lumen maintenance for data for each individual light source along with median value, standard deviation, minimum and maximum lumen maintenance value for all of the light sources

See tables.

## 17. Observation of LED light source failures including the failure conditions and time of failure

No failures observed in devices reported.

## 18. LED light source monitoring interval

Units were tested at 0 hour and at subsequent 1,000 hours intervals.

## 19. Measurement uncertainty

Long-term measurement uncertainty is based on reproducibility tests done over a period of one year, calculated to  $k = 1.97$  coverage (i.e. 95% coverage).

Luminous Flux ( $\Phi_v$ )  $\pm 1.601\%$

Chromaticity shift (x,y)  $\pm 0.000018$

## 20. Chromaticity shift reported over the measurement time

See tables.

## 21. Sampling Method/Sample size

LED samples for IESNA LM-80 testing consist of units built from a minimum of three manufacturing lots with each manufacturing lot built from different wafer lots built on non-consecutive days. These manufacturing lots are picked to represent a wide parametric distribution.

## 22. ISO 17025-2005 Accreditation

### SCOPE OF ACCREDITATION TO ISO/IEC 17025:2005

LUMILEDS LLC  
370 West Trimble Road  
San Jose, CA 95131-1008  
Majed Alayleh Phone: 408-568-3866  
Email: [Majed.Alayleh@lumileds.com](mailto:Majed.Alayleh@lumileds.com)

#### ELECTRICAL

Valid To: July 31, 2017

Certificate Number: 3129.01

In recognition of the successful completion of the A2LA evaluation process (including an assessment of the laboratory's compliance with A2LA's EPA ENERGY STAR® Accreditation Program requirements), accreditation is granted to this laboratory to perform the following tests:

**Test Technology:**

*ENERGY STAR® Testing*

**Test Method:**

Lumen Maintenance of LED Light Sources IESNA LM-80-08

<sup>1</sup> A2LA provides accreditation to the U.S. EPA's [Conditions and Criteria for Recognition of Laboratories for the ENERGY STAR Program](#) by verifying an organization's compliance to A2LA document [R222 - Specific Requirements - EPA ENERGY STAR Accreditation Program](#) and to the related test methods listed above.

Accreditation by A2LA does not infer recognition by the EPA for ENERGY STAR testing. Please verify this organization's recognition status by using the EPA's searchable database, located at [http://www.energystar.gov/index.cfm?Fuseaction=recognized\\_bodies\\_list.show\\_RCB\\_search\\_form](http://www.energystar.gov/index.cfm?Fuseaction=recognized_bodies_list.show_RCB_search_form)

A handwritten signature in black ink, appearing to read "Majed Alayleh".

## Accredited Laboratory

A2LA has accredited

LUMILEDS LLC

San Jose, CA

for technical competence in the field of

### Electrical Testing

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2005  
*General requirements for the competence of testing and calibration laboratories.* This laboratory also meets the requirements of any additional program requirements in the field of Electrical Testing. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer to joint ISO-ILAC-JAF Communiqué dated 8 January 2009).

Presented this 3rd day of June 2015.

Pete Maye  
President & CEO  
For the Accreditation Council  
Certificate Number 3129.01  
Valid to July 31, 2017

For the tests to which this accreditation applies, please refer to the laboratory's Electrical Scope of Accreditation.

## Notes

Data is for reference only and is not an endorsement to exceed the Data Sheet operating conditions.

The TM-21 extrapolations are based on IES TM-21-11 "Projecting Long Term Lumen Maintenance of LED Light Sources. The TM-21 lumen maintenance model is based on the flux data normalized to 1 at 0 hours and the use of a exponential model for flux(time):

Flux(time) = B exp[-alpha\*time], where normally B ≈ 1, and alpha > 0.

An L70 extrapolation less than 0 means that the model predicts an increasing flux output with time, i.e. alpha < 0 (see graphs). Generally, this means that additional test time is needed to determine the long-term lumen maintenance behavior.

## Disclaimer

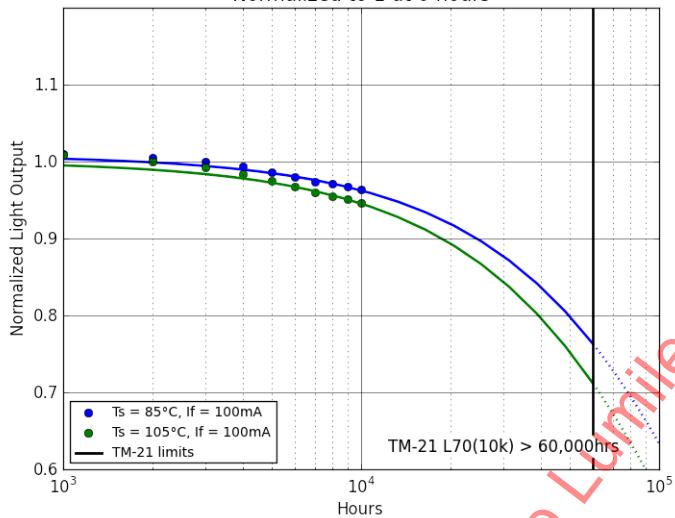

Although LUMILEDS LIGHTING COMPANY has attempted to provide the most accurate information and materials and services data (hereinafter "Data"), the Data is provided "as is" and may contain errors. The entire risk of use of the data shall be with the user. LUMILEDS LIGHTING COMPANY makes no warranty, express or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose, regarding the contents or correctness of the Data provided or the ability of the Data to meet the user's needs or expectations. LUMILEDS LIGHTING COMPANY reserves the right to make changes without notice. You as user agree to this disclaimer and user agreement with the download or use of the provided materials and Data.

In no event shall LUMILEDS LIGHTING COMPANY be liable for any direct, indirect, special, incidental, exemplary, or consequential damages arising out of or related to the use of the Data, however caused, regardless of theory of liability, and whether or not LUMILEDS LIGHTING COMPANY has been advised of the possibility of such damage. This limitation shall apply notwithstanding any failure of essential purpose or any exclusive remedy.

## Company Information

Lumileds is a leading provider of power LEDs for everyday lighting applications. The company's records for light output, efficacy and thermal management are direct results of the ongoing commitment to advancing solid-state lighting technology and enabling lighting solutions that are more environmentally friendly, help reduce CO<sub>2</sub> emissions and reduce the need for power plant expansion. Lumileds LUXEON LEDs are enabling never before possible applications in outdoor lighting, shop lighting, home lighting, digital imaging, display and automotive lighting.

Lumileds is a fully integrated supplier, producing core LED material in all three base colors, (red, green, blue) and white. Lumileds has R & D centers in San Jose, California and in the Netherlands, and production capabilities in San Jose, Singapore and Penang, Malaysia. Founded in 1999, Lumileds is the high flux LED technology leader and is dedicated to bridging the gap between solid-state technology and the lighting world. More information about the company's LUXEON LED products and solid-state lighting technologies can be found at [www.lumileds.com](http://www.lumileds.com).
